
Where L&D and HR Technologies Intersect

Executive Summary

2024 brings an exciting change to a Learning Guild favorite as the Learning Solutions Conference expands to include HR technologies. From Learning Guild CEO David Kelly: “We’re not reducing the scope of ID and Learning you have always enjoyed at Learning Solutions. We are adding new sessions to the program to address the needs of HR professionals. You can expect all the great content you’ve experienced in the past, with additional sessions exploring HR topics as well as new opportunities for L&D and HR team members to learn from one another.”

As the Learning Guild membership is primarily an L&D audience, this report provides an overview of trends in HR technologies. This should be useful to those in L&D wanting to learn more about HR processes, the newer tools supporting them, and the data they can generate to help inform L&D’s work.
